CONTENTS

Preface v

GENERAL HYDROLOGY

Runoff generation and hydrologic response via channel network geomorphology – Recent progress and open problems
V.K. Gupta (University, Miss., U.S.A.) and O.J. Mesa (Medellin, Colombia). 3
Effects of spatial variability and scale with implications to hydrologic modeling
E.F. Wood, M. Sivapalan (Princeton, N.J., U.S.A.), K. Beven (Lancaster, U.K.) and L. Band (New York, N.Y., U.S.A.) 29
Hydrological persistence characteristics of floods and droughts — Interregional comparisons
K. Takeuchi (Kufu, Japan) 49
Technological developments in real-time operational hydrologic forecasting in the United States
M.D. Hudlow (Silver Spring, Md., U.S.A.) 69

DATA COLLECTION AND MONITORING NETWORK DESIGN

Research toward an operational passive microwave remote sensing system for soil moisture
T.J. Jackson (Beltsville, Md., U.S.A.). 95
Hydrologic sampling — A characterization in terms of rainfall and basin properties
R.L. Bras, D.G. Tarboton and C. Puente (Cambridge, Mass., U.S.A.) 113

STUDIES OF RUNOFF PRODUCTION MECHANISMS

The Hachioji Experimental Basin Study — Storm runoff processes and the mechanism of its generation
T. Tanaka, M. Yasuhara (Ibaraki, Japan), H. Sakai and A. Marui (Tokyo, Japan). . . 139
Runoff process on a steep forested slope
Y. Tsukamoto and T. Ohta (Tokyo, Japan) 165
Unsaturated zone soil moisture behavior under temperate humid climatic conditions — Tensiometric observations and numerical simulations

K. Musiake, Y. Oka and M. Koike (Tokyo, Japan) 179
Water flow in unsaturated soil in layered slopes
T. Miyazaki (Tokyo, Japan) 201
Some experimental results concerning rapid water table response to surface phenomena
I. Kayane (Ibaraki, Japan) and I. Kaihotsu (Aichi, Japan) 215
Streamwater chemistry during rainfall events in a forested basin
K. Muraoka and T. Hirata (Ibaraki, Japan). 235

INFILTRATION PROCESS

Kinematic wave characteristics and new equations of unsaturated infiltration
T. Yamada and M. Kobayashi (Sapporo, Japan). 257
Effect of initial soil moisture content on the vertical infiltration process — A guide to the problem of runoff-ratio and loss
M. Hino, Y. Odaka, K. Nadaoka and A. Sato (Tokyo, Japan) 267

MODELLING OF THE RAINFALL–RUNOFF PROCESS

Analysis of three-dimensional groundwater flow in the near-surface layer of a small watershed
K. Watanabe (Saitama, Japan). 287
Incorporation of the effect of concentration of flow into the kinematic wave equations and its applications to runoff system lumping
T. Takasao and M. Shiiba (Kyoto, Japan) 301
Effects of slope conditions on direct runoff characteristics by the interflow and the overland flow model
K. Sunada (Kofu, Japan) and T.F. Hong (Sapporo, Japan) 323
Effect of storm rainfall intensity patterns on surface runoff
D.A. Woolhiser and D.C. Goodrich (Tucson, Ariz., U.S.A.) 335
Soil–aquifer–stream interactions — A reductionist attempt toward physical-stochastic integration
H. Morel-Seytoux (Fort Collins, Co., U.S.A.) 355
Evaluation of rainfall–runoff models from the stochastic viewpoint
T. Takasao and K. Takara (Kyoto, Japan) 381

EVAPORATION

The parameterization of regional evaporation — Some directions and strategies
W. Brutsaert (Ithaca, N.Y., U.S.A.). 409
Evaporation from Lake Biwa
S. Ikebuchi (Kyoto, Japan), M. Seki (Siga, Japan) and A. Ohtoh (Osaka, Japan) . . . 427

GROUNDWATER FLOW AND TRANSPORT

Prediction by the method of moments of transport in a heterogeneous formation
P.K. Kitanidis (Stanford, Calif., U.S.A.) 453
Use of variable-scale pressure test data to estimate the log hydraulic conductivity covariance and dispersivity of fractured granites near Oracle, Arizona
S.P. Neuman (Tuscon, Ariz., U.S.A.) and J.S. Depner (Richland, Wash., U.S.A.) 475
The lifetime probability density function for solute movement in the subsurface zone
G. Sposito and W.A. Jury (Riverside, Calif., U.S.A.) 503
